Rohan Sen

Full Stack Developer · Python · Django

Kolkata, West Bengal | +91 98765 43210 | rohan.sen@example.com
github.com/rohansen-dev | linkedin.com/in/rohan-sen-dev

SUMMARY

Full stack developer who builds complete web applications with Python, Django and PostgreSQL. Built and deployed Inkwell Books, an e-commerce bookstore with payments, order tracking and an AI chatbot. Comfortable owning a feature from database model to responsive UI and cloud deployment.

SKILLS

Languages	Python, JavaScript, HTML5, CSS3, SQL
Backend	Django, Django ORM, authentication, Django Admin, JSON endpoints
Frontend	Responsive layouts (Flexbox, Grid), vanilla JavaScript, AJAX
Database	PostgreSQL, SQLite, migrations
Tools	Git and GitHub, Razorpay, Render, VS Code

PROJECT

Inkwell Books – Online Bookstore

Python, Django, PostgreSQL, JavaScript, Razorpay · Render + Neon · github.com/rohansen-dev/inkwell-books

- Built the full application as separate Django apps: accounts, catalog, cart, orders, blog, careers and chatbot.
- Created sign-up and login in a popup modal, user profiles, a dashboard and order history.
- Built category, collection and discount pages with search, sorting, wishlist and cart.
- Integrated **Razorpay** with server-side signature verification, plus Cash on Delivery.
- Created an **order tracking timeline** (Placed to Delivered) that staff advance from a custom Django Admin panel.
- Added printable invoices and a 1–5 star rating for each purchased book.
- Added an **AI chatbot** that helps customers choose books.
- Deployed to production on Render with a managed Neon PostgreSQL database.

EDUCATION

B.Tech in Computer Science and Engineering

Example Institute of Technology, Kolkata · 2026 · CGPA 8.4 / 10

Course: Cloud-Based Full Stack Development using Python Django with AI Integration
